| Biological limit values | No biological exposure limits noted for the ingredient(s). |
| Appropriate engineering controls | Good general ventilation (typically 10 air changes per hour) should be used. Ventilation rates should be matched to conditions. If applicable, use process enclosures, local exhaust ventilation, or other engineering controls to maintain airborne levels below recommended exposure limits. If exposure limits have not been established, maintain airborne levels to an acceptable level. |
| Individual protection measures, such as personal protective equipment | |
| Eye/face protection | Avoid direct contact with eyes. If contact is likely, safety glasses with side shields are recommended. Not normally needed. |
| Skin protection | |
| Hand protection | For consumer use, no unusual precautions are necessary. For prolonged or repeated skin contact use suitable protective gloves. |
| Skin protection | |
